UNITED SASH & DOOR CO.

WE PRESENT herewith plans and descriptions of residences, bungalows and cottages for our trade. These plans are all original and they are accurate. We have spared neither time nor expense to put out a book of reliable plans and one that will be of value to our friends and customers.

Our plan book has solved the home building problem for thousands of people. We have furnished the plans for modern, economical homes and for costly residences, and you should surely be able to make a suitable choice from the many designs we have illustrated and described. If you are tired of paying rent or moving, select your new home now and start building at your earliest convenience.

No carpenter is capable of copying or building any of the homes shown in this book from the little picture illustrating the home. He should have a copy of the blue print drawings, working details and specifications, in order to follow out the beautiful lines and attractiveness of each design. He would harm the beauty of your home if the location of the windows and doors were out of position, and he might get into serious trouble if he attempted to build the roof without knowing just what pitch we had intended.

We have worked this all out in detail very carefully in our blue print drawings

working details and specifications, and show exactly what is required to get the most room and the most economical construction for the money.

We promise to save you more than the cost of these plans many times over in the construction of your home from them. When you order mill work, sash and doors from our plans, they will agree with and fit the frames and openings, thereby avoiding expense and delay.

We can furnish any style of sash, doors and interior finish in Yellow Pine, Oak, Birch, or other hardwood. Our Mill Department is complete and prepared to execute all kinds of special mill work.

We distribute the Martin-Senour Company's MONARCH 100% pure lead, zinc and linseed oil paint in a big variety of colors. For interior flat wall work we sell Neu-Tone flat washable wall paint; also high grade creosote shingle stain in all colors; S. C. Johnson's line of paste wood fillers and wood stains; and the Standard Varnish Works' and Boston Varnish Company's materials.

We solicit your inquiries and orders.

PLAN No. 600—COST \$4,500 TO \$5,000

The five room Bungalow has come to be very much in demand for the newly married couple, or the very small family.

This design we present as one of our most popular and best arranged plans of that style and type.

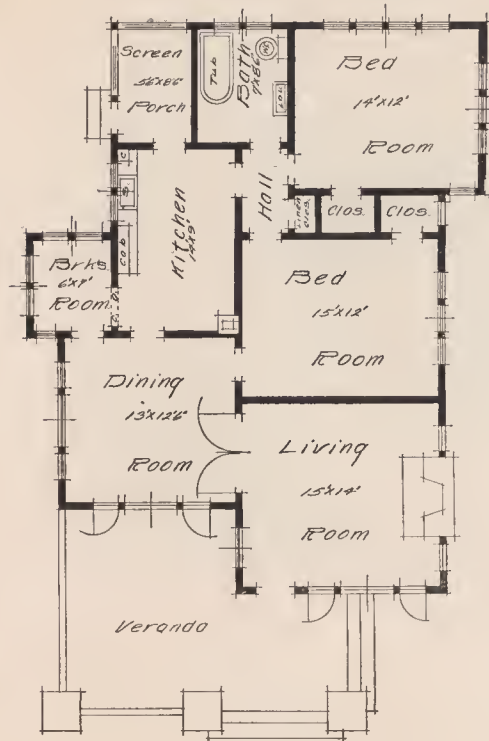

There is a large veranda in front.

A large living room with mantel, opens into the dining room through French doors and there is a cozy little breakfast room, just off the dining room and kitchen.

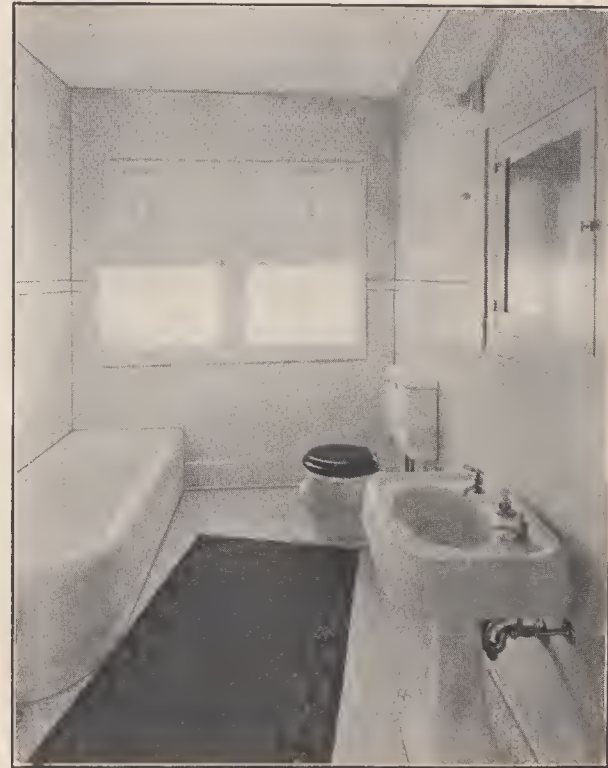

There are two good sized bed rooms, a bathroom and a screened-in porch.

There are also plenty of closets for every need.

Floor Plan No. 600

Typical Bathroom

PLAN No. 601—COST \$3,250 TO \$3,750

An attractive Bungalow is the ideal home for the newly married couple, or the small family.

This one we submit, is pleasing in outline and convenient in arrangement. The living rooms and bed rooms are placed so as most effectually to economize space and assure satisfaction and comfort.

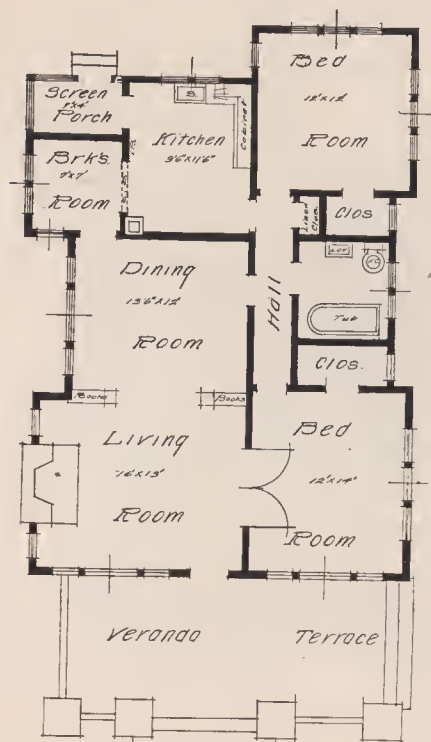

The living room and dining room are separated merely by the built-in bookcases and the front bed room opens off the living room, connected by French doors.

Just off the dining room and kitchen is the bright little breakfast room.

In the kitchen is the large built-in cabinet and built-in ironing board.

There is also a screened-in back porch of good size.

PLAN No. 604—COST \$7,000 TO \$8,000

Here is a house that is unique in appearance and design.

The exterior appearance is one of artistic beauty.

The interior design is decidedly different from that of any other style house that we have ever built.

The large living room in the middle of the house is entered by three sets of French doors. The living room, large and roomy, is lighted by an artistic lighting arrangement in the ceiling. This room has beam ceiling. Special attention is called to the height of the ceiling, and the large, beautiful mantel and fireplace at the end of the room, with doors on each side of the fireplace leading into the solarium, and to the large veranda just off the solarium.

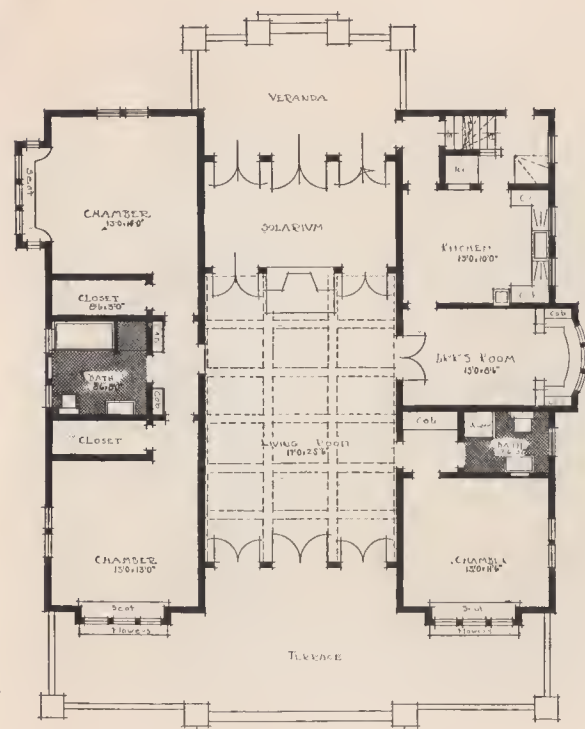

The sleeping chambers, three in number, all open into the living room.

There are two private baths, one on each side of the house.

The dining-breakfast room is entered by French doors and has built-in window seats.

There are also built-in window seats in each one of the sleeping chambers.

PLAN No. 605—COST \$7,500 TO \$8,000

This is without doubt one of the most attractive six room bungalows we have ever constructed. It has a large veranda and a terrace over which is built a pergola.

The rooms are conveniently arranged. The living room and dining room are large and spacious, both have beam ceilings. Living room has built-in bookcases and mantel. Dining room has large built-in buffet which takes up one entire wall. There are three bed rooms and clothes closets. One of the bed rooms also has mantel.

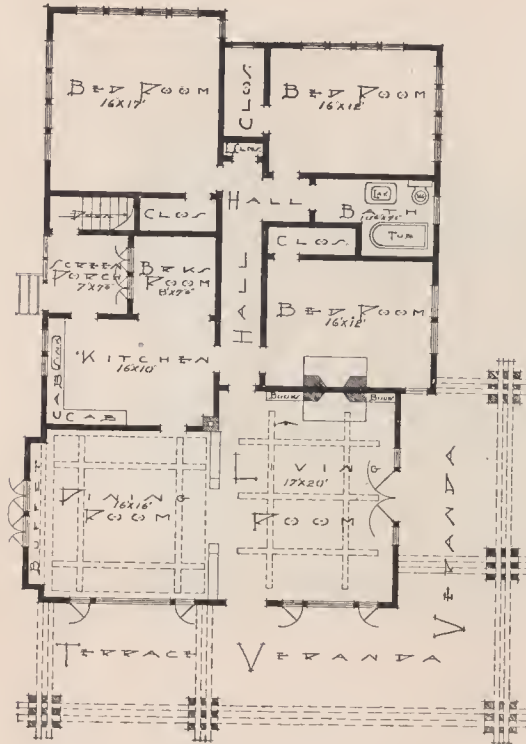

Bathroom has tile floor, built-in medicine cabinet, etc.

Kitchen has built-in cabinet and opens into a cozy little breakfast room.

Back porch is screened-in and has stairway leading to basement.

This house has given universal satisfaction wherever it has been built, and we can recommend it very highly.

The Bungalow is one of our most popular designs for small houses.

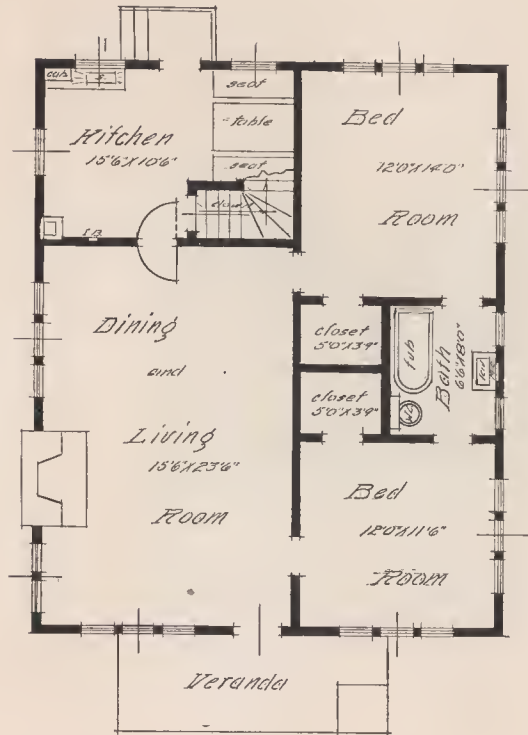

This creation we consider one of the most artistic of our many designs.

Here are the lines of beauty and comfort, in miniature, which distinguish our large houses, and for a small family, this cozy little home cannot be surpassed.

Attention is called to the glass front door and the many windows, which mean abundant light and ventilation.

The indoor features are the combined living and dining room, which is a popular and convenient arrangement now much in use; the breakfast room just off the kitchen with built-in table and seats; the two bed rooms, conveniently placed, with bathroom between, and the large closets.

The Aeroplane Bungalow has met with such wide-spread appreciation that we have given much effort to the perfecting of our various designs of this style of architecture.

In the design here submitted, we believe we have one of the most artistic and roomy types of this class.

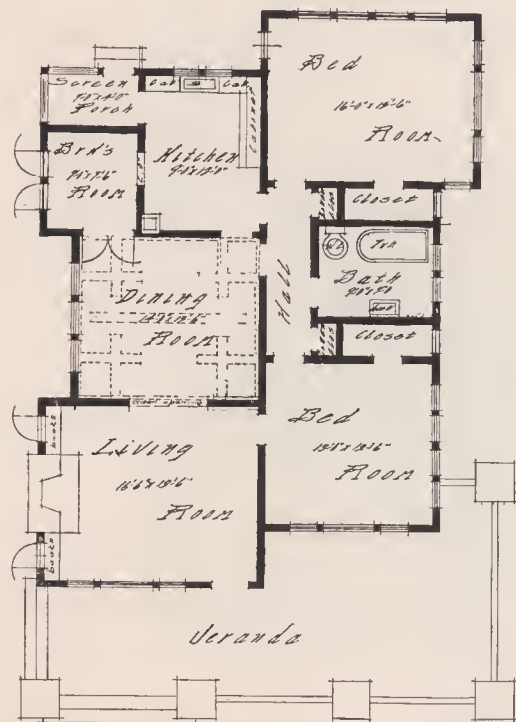

In this house there are eight rooms and a breakfast room. On the first floor is the living room, the music room, dining room with beam ceiling, breakfast room, kitchen, two bed rooms and a bath room.

On the second floor are two bed rooms and toilet.

A careful study of the floor plan will reveal minor convenient and necessary features, which will commend this plan especially to the housewife.

The large living room located in the center of the house is easily accessible from all rooms.

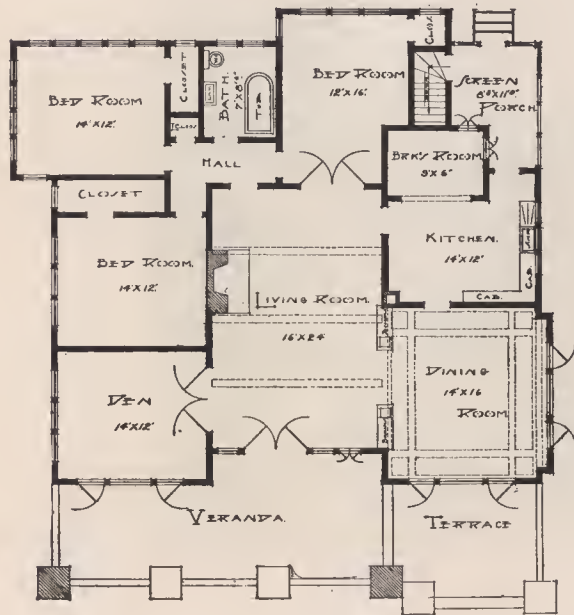

It has beam ceiling and a large mantel.

Dining room also has beam ceiling. The living room and dining room are separated by bookcases and colonnade.

The den is connected with living room by French doors.

A glimpse at this floor plan will reveal at once the large number of rooms and the great amount of floor space in this house, and we recommend it to anyone who needs an abundance of room.

PLAN No. 644—COST \$5,500 TO \$6,500

This plan is designed especially for a fifty-foot lot. It is of stucco on metal lath. The porch piers are stucco on brick.

We wish to call attention to the fact that this house as well as all of our other houses has double floors.

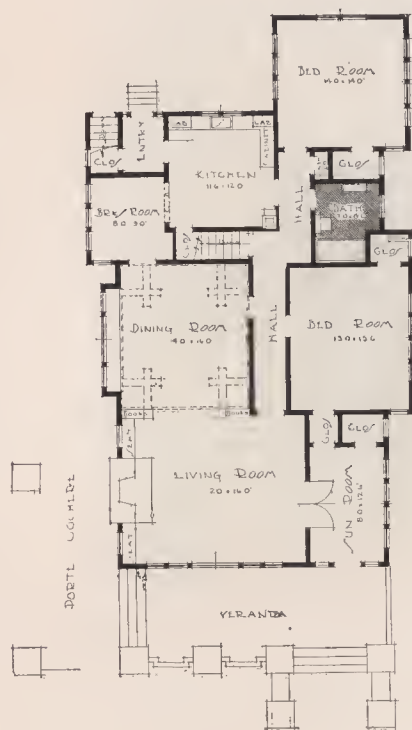

The living room opens into a delightful sun room through French doors.

The two bed rooms open on a hall and are easily accessible to bathroom.

There is a large deep veranda in front with a porte-cochere extending over driveway.

There is an air of class and refinement about this house that is not to be found in many bungalows of this class.

PLAN No. 645—COST \$5,500 TO \$6,000

This plan has been built by us many times and is a pleasing and satisfying design. The stucco porch piers, massive in design, gives one an idea of permanence and solidity. The pergola in the front adds beauty to this plan. The living room and dining room are separated by oak circle top colonnades. The dining room has beam ceiling and opens both into the breakfast room and kitchen. There are two good sized bed rooms.

PLAN No. 705—COST \$16,500 TO \$18,000.

This house has all the appearance of a Mansion, although of moderate size and not exorbitant cost. Here are simplicity, beauty and majesty combined.

A study of the floor plan on the opposite page will reveal the excellent arrangement suitable for an elegant and comfortable home.

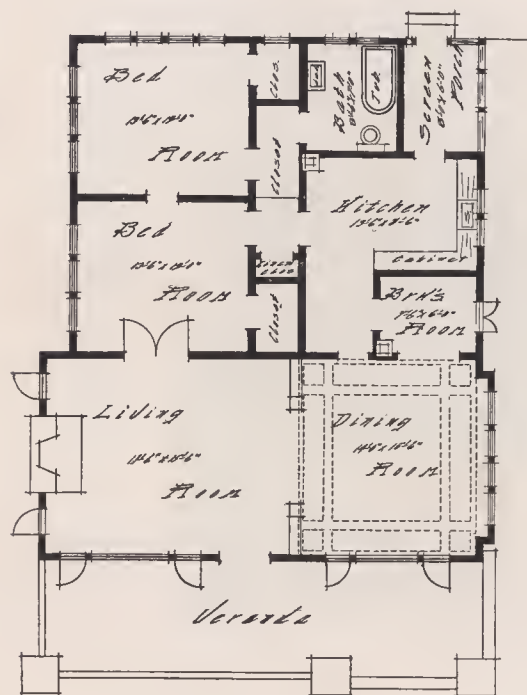

This house has a profusion of French windows and the living room, music room, and breakfast room are all entered by French doors.

On the first floor are two bed rooms and bathroom. On the second floor are two bed rooms and a bathroom.

The wide steps, the heavy piers and columns, the wide windows and beautiful doors, as well as the general outline of the house, lend an air of quiet elegance, such as is usually seen in houses of much greater cost.

A Very Convenient Kitchen

PLAN No. 648—COST \$5,000 TO \$5,500

The dining room is placed in front in this bungalow plan and this arrangement is very pleasing to a great many people.

The kitchen is placed near the front of the house and the bed rooms are at the sides and rear. This makes this design especially desirable for north or east front.

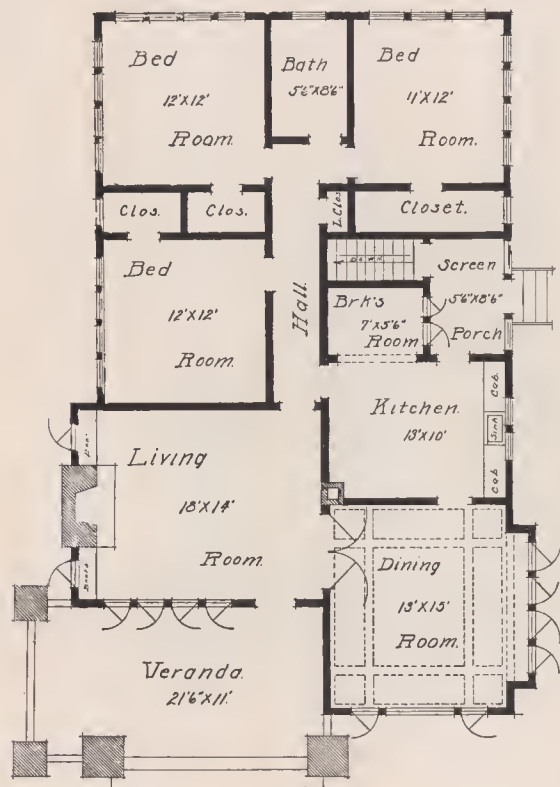

Note the great number of French casement windows which open outward.

The bathroom is placed at the end of the hall and is very convenient to all bed rooms.

All the rooms of this house, with exception of dining room, open into hallway.

This is a very pleasing six-room bungalow plan.

PLAN No. 653—COST \$3,000 TO \$3,500

This design is a small inexpensive bungalow. It has one bed room just off the living room. Moreover there is a good size dressing room just off the living room in which there is an in-a-door bed, which can easily be drawn out into the living room. This practically makes another bed room with great economy of space.

This house is very compactly and conveniently arranged. The kitchen has the usual built-in features.

SPECIAL PLANNING DEPARTMENT

Have you some ideas of your own or some special requirements that you would like included in the plans for your new home? Will you make a little sketch and let us put it into practical shape for you?

We can take any sketch you send us and put it into practical shape for your approval and consideration. If you have any style of home in mind and will send us a sketch of it or a clipping suggesting changes to suit your ideas, our special planning department will draw it up to 1/4-inch scale and send it to you.

Our charges for special plans average about \$7.50 per room, counting main rooms only.

We charge \$10.00 for sketch plans of your ideas drawn up to 1/4-inch scale, and make floor plans and sketches or pictures of one or two elevations showing how the house will look when completed. When the sketches have been O. K.'d or corrected by you, we will complete the blue print drawings, working details and specifications, and the \$10.00 sent for the preliminary sketches will apply on the balance for your plans, working details and specifications.

CONCERNING ORDERING PLANS

After selecting your plan, order by number and send us Bank Draft, Cashier's Check, Postal or Express Money Order for amount of the plan as shown under each cut, unless you have an account with us.

If, within thirty days after receipt of the plans, you decide they are not just what you want, you may return them, selecting any other ready made plan *in exchange*, or we will be glad to apply purchase price on any special plan that we may make for you.

Our plans contain basement plan, floor plan, four elevations and complete details. The average plan contains from 8 to 15 sheets—size of sheets being 18x30 inches.

They are plain and easy to read and run to a scale of one-fourth inch to the foot. A set of specifications accompanies each plan. These specifications contain 18 pages of typewritten matter. The price of the plans vary from \$10.00 to \$25.00. If these plans were drawn separately, they would easily cost the prospective builder from \$50.00 to \$100.00 each.

Enclosed will be found list giving approximate cost of buildings as shown. It is our idea to revise this list from time to time as the price of building commodities fluctuate.
